2. Short description of nature and quantity of value of services.

a) Object:

Open Market Consultation (OMC) to prepare the tender documentation for the procurement of "Service of registration and promotion of the adherence to medications in elderly patients (SAMPA) with destination to the Unit of Pharmacy of External Patients of the University Hospital Miguel Servet "

The University Hospital Miguel Servet (hereinafter, HUMS), has planned the completion of a tender to procure services of registration and promotion of the adherence to medications in elderly patients (SAMPA) with destination to the Unit of Pharmacy of External Patients in the area of influence of the HUMS and associate centres.

The ultimate aim of the procurement is to ensure maximum efficiency in the care process of patients through the use of digital technologies, patients empowerment and the coordination and joint responsibility between the HUMS and the contractor, during the whole treatment life cycle.

For this reason, the contract aim includes all aspects of the care process, including but not considering this a fixed list:

- 1- Electronic prescription platform (integrated with health systems in use in the HUMS)
- 2- Automated stock management and drug storage UAF-PEX

HOSPITAL UNIVERSITARIO “MIGUEL SERVET”

- 3- Automated dispensing of medicines
- 4- Assessment of adherence through agreement between prescription and dispensing. Availability of an outpatient repository. Availability of a distributed platform
- 5- Any tasks or structural modifications necessary for operation

Moreover, as digital technologies are the basis for the improvement of the procedure, the awarded bidder must guarantee the technological renovation and incorporation of new technologies that may arise during the duration of contract.

b) Estimated cost excluding VAT: 800.000 Currency: EUR

c) Common procurement vocabulary (CPV)

Main object

85000000

3. Further information

Through this tender HUMS intends to test and validate the European Specification Template (EST), a flexible template for procurement, which can be used across Europe to promote cost-effective commissioning of Health services, enabling the implementation of innovative care models for elderly people through the support of digital technologies.

The EST is a key output of the STOPandGO project. The EST is available, in English, at the following link: <http://stopandgoproject.eu/est/STOPandGO> (Sustainable Technology for Older People – Get Organised) is a Public Procurement of Innovation (PPI) project co-founded by the European Commission under CIP-ICT-PSP-2013-7 (www.stopandgoproject.eu).

Its purposes are:

- To develop the European Specification Template, i.e. a set of European guidelines to define and manage public tenders for the procurement of health and social services enhanced by digital technologies that will enable the implementation of innovative care models for elderly people;
- To ensure that commissioned services are innovative, or based on existing technologies that are to be used in a new and innovative way;
- To test and evaluate the procurement process through a set of co-founded tenders launched in four different countries: Italy, Spain, United Kingdom, Netherlands;
- To produce a final report and a release of the European Specification Template (EST) usable in any European Regions to support the strategies described in the “Strategic Implementation Plan” of the European Innovation Partnership on Active and Healthy Ageing (EIPonAHA).

In order to come to a complete definition of the tender, in line with the requirements of the PPI instrument, an Open Market Consultation (OMC) is held prior to the actual tender processes taking place. The purpose of the OMC is:

- to inform about the tender process, in order to achieve the widest participation of interested parties;
- to learn about quality and technical characteristics of the proposed solutions on the market;
- to allow interested parties to provide comments and suggestions considered useful for the contracting authority in preparation of the tender.

HOSPITAL UNIVERSITARIO “MIGUEL SERVET”

Please note that this consultation does not oblige HUMS to award the contracts proposed, nor sets limits to the content of the tender.

The instructions regarding the completion of the above OMC are available until 23/02/2017 at the following web address:

<https://sectorzaragoza2.salud.aragon.es/pags/cpi>
